

Emissions scope	Emissions (tCO2e)
Scope 1 emissions	6.05
Scope 2 location-based emissions	16.75
Scope 2 market-based emissions	0
Scope 3 emissions (business travel)	9.24

Our 2021 emissions were calculated following the GHG Protocol Corporate Standard using the operational control approach to ensure an accurate account of our GHG and energy reporting.

Our Scope 2 market-based emissions are calculated as zero, as 100% of the electricity comes from certified renewable electricity sources. Our business travel included flights, trains, car mileage, and hotels. All emissions were calculated using DEFRA 2021 emissions factors.
